

Request for a Subcommittee Meeting

To: Joel D. Boyd, Ed.D Superintendent

From: Liam Skinner, Chief School Officer

Date: January 26, 2022

Re: Request for Subcommittee Meeting

In accordance with the LPS 5-year strategic plan that was adopted by the Committee in 2020 and our districtwide goals for SY2021-2022, we have been proceeding with the design of an expanded and improved centralized service delivery and support model for schools. We are at a juncture in the design process where an in-depth discussion with the Committee could be beneficial ahead of the FY23 budget process.

The subcommittee format would likely be most productive to enable a focused and robust discussion on this topic. If authorized, as the assigned administrative representative to the School Improvement and Performance Management Subcommittee, I look forward to working with the appointed subcommittee Chair to develop an agenda which enables public discussion of the following items:

1. Updates to the school-based Quality Improvement Planning (QIP) process, including measurable school performance indicators and improved data visualization for SY2022-2023;
2. Refined programmatic guidance and guardrails for principals to further ensure instructional alignment within school-based planning; and
3. The design of Professional Learning Networks to provide added collaborative support for school leaders based on their school improvement needs in SY2022-2023.
